Experience

Capital One (Previously Discover)

Principal Associate Engineer

Remote, New York

Dec 2023 – Present

- Orchestrated the migration of services from Instana to Datadog, optimizing application performance and enhancing the customer experience
- Directed cross-functional effort to replace legacy code with a responsive, user-friendly interface for agent feedback and complaints
- Created a micro-frontend architecture that supported seamless CI/CD workflows, allowing the team to build and deploy independently
- Collaborated with stakeholders to gather requirements, create user stories, and develop project backlogs for upcoming initiatives
- Facilitated biweekly engineering sessions to support knowledge sharing and skill development among colleagues

Zipcar

Software Engineer II

Remote, Boston

Feb 2023 – Oct 2023

- Introduced a Storybook-driven custom component library to improve cross-team collaboration and reduce UI redundancy in development workflows
- Engineered offline mode support in the zipcar checklist application, ensuring field agents can operate effectively in low-connectivity environments
- Advocated for the implementation of Snyk to address and resolve all critical and medium system vulnerabilities for the Vision product organization
- Led the migration to Node 14 across multiple repositories, beginning a large scale devops transition

Legitimate Tech

Software Engineer

Remote, Boston

Jan 2022 – Aug 2022

- Built a bidding platform using React, GraphQL, and NestJS, catering to both web3 and non-web3 creatives
- Applied Atomic Design principles to create a structured interface design system in React
- Implemented a REST API in Ruby to validate encrypted codes from NFC chips
- Boosted test coverage by 70% across the platform through the implementation of integration and unit tests

Fidelity Investments

Software Engineer

Boston, Massachusetts

June 2019 – Dec 2021

- Provided leadership and technical direction for customized components within internal applications
- Developed personalized applications to aid Project Managers perform their job more efficiently
